

F GAS PYRAMID – HUNGARY INPUT

LEVEL	HUNGARY ACTION
F Gas Regulation	Implemented into Hungarian law in a common governmental decree based on ODS and F-gas regulations (310/2008 (XII.20.))
Commission Regulations	As Above
Member states implementation	Effective from 15 January 2009
Certification bodies	The Hungarian Monitoring and Certification Body (MCB) is the Hungarian government department responsible for this legislation and they have nominated 1 organisation as Certification Bodies to issue certificates to wholesale companies. There can be no delivery of F-gases to non-certified companies that do not have non-certified personnel. This covers all the refrigerants used by then installed and mobile sector.
Evaluation bodies	The evaluation body work is done by the VET schools, appointed by the MCB.
Training institutes	Training in Hungary is provided by the Hungarian Refrigerator and Air Conditioning Association (HRACA). The courses are special training courses given by the HRACA itself.
Certified companies	There is still a transition in the Hungarian system. Certificates I,II and IV in the refrigeration, air-conditioning and heat pump applications have been installed, and the MAC VI and VII have been approved for transport. Refrigerant wholesaler and dealers for all sectors using f-gas have been certified. There is no delivery of F-gas products to non-certified companies who do not have certified personnel in the installed and mobile sector.
Certified persons	This is still in a transitional period. Personnel certificates from I to IV for personal in refrigeration, air-conditioning and heat pump applications have been certified. For mobile transport certificates V to VII have been certified.
Operations	(Not Available)
